PROFILE SUMMARY

B.E. Computer Science graduate (2025, CGPA 8.31/10) seeking a Data Analyst or Business Analyst role. Skilled in SQL, Power BI, DAX, Excel and Python for data cleaning, exploratory analysis and KPI dashboards. Built a sales and profit dashboard with drill-down insights and a Student Performance Prediction model using Python. Completed Deloitte's Data Analytics job simulation and an AWS cloud internship. Strong in analytical thinking, problem solving, documentation and teamwork, eager to turn data into clear insights that support business decisions.

INTERNSHIPS

Rooman Technologies – (IT Ignition Cloud Intern) **Dec 2024 – Apr 2025**

- Worked hands-on with AWS cloud services, including Amazon S3 for secure data storage and management.
- Learned cloud networking, security principles and database management for structured data storage and retrieval.
- Completed practical cloud projects and case studies that strengthened problem-solving and analytical skills.
- Tech stack: AWS, Amazon S3, cloud networking, databases.

Aqmenz Automation Pvt. Ltd – (Python & Data Science Intern) **May 2023 – Jun 2023**

- Completed an internship in Python programming with data science applications.
- Used Python for data handling and analysis, and received a certificate of internship.
- Tech stack: Python, data analysis.

PROJECTS

Student Performance Prediction using Machine Learning **2025-Final Year Project**

- Built a system that predicts student marks from attendance, subject marks, behaviour, teacher feedback and assignment completion, with data encoding and scaling.
- Tuned and compared Random Forest and Gradient Boosting models using GridSearchCV and 5-fold cross-validation.
- Built a Flask web app that saves each prediction, and ran 10 test cases.
- Co-authored a paper published in the International Journal of Research Publication and Reviews (May 2025).
- Tech stack: Python, Pandas, NumPy, Scikit-learn, Flask, Joblib.

Business Intelligence Dashboard for Sales and Profit Analysis **Data Analyst**

- Built an interactive Power BI dashboard on sales performance, profit trends and customer segments, after cleaning, transforming and modeling the data.
- Created KPI cards for revenue, profit and quantity sold, with filters and drill-down by region, state, segment and product sub-category.
- Tech stack: Power BI, DAX, Excel.

EDUCATION

R L Jalappa Institute of Technology (VTU) **2022 – 2025**

Course: B.E. Computer Science & Engineering, CGPA: 8.31/10

Nuzvid Polytechnic, Andhra Pradesh **2019 – 2022**

Course: Diploma, Mechanical Engineering, 7.6/10

SKILLS

- SQL
- Python
- Power BI
- Pandas
- NumPy
- MS Excel
- Statistics Basics
- DAX & Power Query
- Matplotlib
- Data Cleaning
- Data Visualization
- Data modeling & ETL

CERTIFICATIONS

- Data Analytics Virtual Job Simulation by Deloitte (Forage)
- Power BI Dashboard Design and Data Visualization by Power BI Micro Course
- SQL for Data Analysis by Simplilearn Skill Up (Apr 2025)
- Data Analytics Essentials by Cisco Networking Academy (Apr 2025)
- ER Modeling by Infosys Springboard (Jun 2025)
